GI Balance Pro is a powerful probiotic supplement that supports a healthy gut environment. With 1 billion CFU of patented, highly stable probiotics per chew and the added benefit of soluble prebiotic fiber, this delicious supplement offers advanced gastrointestinal and immune support.

DUCK FLAVOR

RECOMMENDED FOR:

- › Dogs and cats in need of support for proper digestion, intestinal health, and immunity
- › Pets experiencing changes to diet or exposed to increased stress
- › Cats experiencing frequent vomiting of hairballs

GI Balance Pro supports digestion, gastrointestinal comfort, regularity and immune health in dogs and cats.

GI Balance Pro is a synbiotic supplement recommended for daily use, and during times of increased stress, such as traveling, kenneling and training. It is ideal for pets with digestive issues and to support normal bacterial balance after antibiotic therapy.

GI Balance Pro:

- › Contains 1 billion CFUs of probiotics per chew
- › Includes the soluble fiber benefits of FOS
- › Highly palatable chew for dogs and cats
- › Contains a highly stable probiotic species called GanedenBC³⁰® (*Bacillus coagulans*)

About Probiotics:

- › Probiotics are beneficial microorganisms that help control the critical balance in the digestive system and prevent the growth of undesirable microorganisms. Balance within the digestive system is essential to maintain a healthy GI tract, protect against disease, improve digestion and enhance overall health. Microflora also reside in other areas where mucous membranes are exposed to the environment, such as the skin, respiratory tract and genital-urinary tract.

Benefits of probiotic treatment for dogs and cats:

- › Assists in digestion, absorption and regularity
- › Provides a source of live, naturally occurring microorganisms beneficial to the intestines
- › Supports the breakdown and assimilation of nutrients for overall health
- › Supports a healthy immune system

About GanedenBC³⁰™

- › GanedenBC³⁰™ is now the first and only probiotic ingredient to be non-GMO verified by the Non-GMO Project. In addition, GanedenBC³⁰™ is the first probiotic to show protein utilization benefits, and it is FDA GRAS and USP Monograph listed.

About FOS (Fructooligosaccharides):

- › FOS are prebiotic fibers that support the growth of beneficial bacteria in the intestinal tract. Prebiotics have been shown to inhibit the growth of harmful bacterial species. Because FOS are not digested by the body, they help increase the amount of material in the intestinal tract and stimulate the elimination process to support regularity.

FEEDING DIRECTIONS:

0-30 lbs: 1 chew daily
31-60 lbs: 2 chews daily
61+ lbs: 3 chews daily

GanedenBC³⁰™ (*Bacillus coagulans* GBI-30, 6086)

GUARANTEED ANALYSIS PER CHEW (3 G):

Levels represent minimum values unless otherwise stated:

Moisture (max) 10.44 %
