

# UT STRENGTH PRO

- » Contains ingredients shown to support a strong and healthy urinary tract
- » Naturally sourced alternative to traditional remedies that addresses underlying issues
- » Cranberry powder helps maintain a healthy pH balance along with other urinary tract benefits
- » Features GanedenBC<sup>30</sup>®, a patented probiotic backed by 17 published studies and FDA GRAS status

0900605.060

## CANINE FORMULA

**ALL  
WEIGHT  
RANGES**

**7 DAYS A WEEK**

UT Strength Canine is recommended to support a healthy urinary tract.

**CHICKEN LIVER FLAVOR**

### RECOMMENDED FOR:

- » Dogs predisposed to urinary issues such as crystals
- » Senior dogs more prone to urinary tract issues
- » Dogs suffering with long term urinary problems

UT Strength Pro is formulated to support urinary tract health and can be used long term with animals who are predisposed to UT issues and crystals.

**INGREDIENTS OF INTEREST:**

- › D-Mannose is a naturally-occurring simple sugar that removes “bad” bacteria by attaching to harmful bacteria and eliminating it. It’s absorbed eight times slower than glucose and, when ingested, is not converted to glycogen or stored in the liver, but goes directly into the blood stream from the kidneys to the bladder. Traditional therapies might cause an imbalance in the normal flora, while Mannose supports the displacement of harmful bacteria.
- › N-Acetyl Glucosamine, or NAG, is an important form of glucosamine found in the body. It is the form that is used for the production of glycoproteins. The glycoprotein layer in the mucosal lining of the urinary tract has a high content of NAG. This layer of mucosal cells is the protective barrier against acids and bacteria, and it is replaced every 3-4 days. Due to this high cell turnover rate, the urinary tract requires increased amounts of NAG to support structural integrity and functionality.
- › GanedenBC<sup>30</sup>® (*Bacillus coagulans* GBI-30, 6086) is a gram-positive, spore-forming, lactic acid producing strain of *Bacillus coagulans*. It is covered by 13 domestic and numerous international patents with others pending. Research has demonstrated its ability to:
  - ›› Maintain proper biodiversity (variety of all the strains) in the small and large bowel
  - ›› Support proper digestion by producing a wide spectrum of enzymes
  - ›› Utilize undigested carbohydrates and lipids in the small bowel
  - ›› Help regulate gut-associated cytokine activity
- › Cranberry powder helps to maintain normal urine pH. It naturally contains proanthocyanidins, or PCOs, that neutralize free radicals and help prevent the adherence of pathogenic bacteria to the cells that line the bladder and urinary tract. Cranberry has also been used as a urine deodorizer as it decreases the strong smell of ammonia.

**DIRECTIONS FOR USE:**

0-30 lbs: ..... 1 chew daily  
 31-60 lbs: ..... 2 chews daily  
 61+ lbs: ..... 4 chews daily

**ACTIVE INGREDIENTS PER CHEW:**

D-Mannose .....	400 mg
N-Acetyl-Glucosamine (Shrimp and Crab) .....	400 mg
Cranberry Powder .....	200 mg
Bromelain .....	200 mg
Corn Silk .....	120 mg
GanedenBC <sup>30</sup> ® .....	200 million CFU
<i>(Bacillus coagulans</i> GBI-30, 6086)	

**Inactive Ingredients:** barley flour, brewers yeast, calcium sulfate, chicken liver flavor, citric acid, glycerin, maltodextrin, mixed tocopherols, oat flour, oat meal, propionic acid, rice flour, rosemary extract, rye flour, safflower oil, silicon dioxide, sodium alginate, soy lecithin, vegetable oil.

PROTEIN MIN	13.77%	FAT	18.91%	FIBER	1.14%	ASH MAX	6.95%	CARBS	52.90%	CALORIES PER CHEW	20
